

## PowerLogic Users Group Conference 2011

*Date:* Friday October 21, 2011

*Location:* Toronto Congress Centre, 650 Dixon Rd. Toronto, ON, M9W 1J1

| <b>Time</b>                                  | <b>Topic</b>                                                                                                                                                                   |                                                                                                  |
|----------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| 7:30                                         | <b>Breakfast &amp; Registration</b>                                                                                                                                            |                                                                                                  |
| 8:30 – 9:40<br><br>Panel discussion with Q&A | <b>Introduction</b>                                                                                                                                                            | <i>Eric Langford</i>                                                                             |
|                                              | <b>Welcome</b>                                                                                                                                                                 | <i>Richard Stetler<br/>Vice President Business Development - Americas<br/>Schneider Electric</i> |
|                                              | <b>Market Outlook - Smart Grid</b><br>Requirements for increased system reliability, electric vehicles, and renewable distributed generation are changing the electrical grid. | <i>Joshua Wong<br/>Opus One Solutions Inc.</i>                                                   |
| <b>9:40 – 9:50</b>                           | <b>Break</b>                                                                                                                                                                   |                                                                                                  |
| 9:50 – 12:30                                 | <b>Seminars (see below)</b><br><i>Delegates will switch between sessions</i>                                                                                                   | Break-out rooms                                                                                  |
| 12:30 – 1:30                                 | <b>Lunch</b>                                                                                                                                                                   |                                                                                                  |
| 1:30 – 2:15                                  | <b>Workshops (see below)</b><br><i>Delegates can switch between sessions</i>                                                                                                   | Break-out rooms                                                                                  |
| 2:15 – 2:30                                  | <b>Closing Comments – Draw prizes</b>                                                                                                                                          | Main Hall                                                                                        |

## PowerLogic Users Group Conference 2011

Date: Friday October 21, 2011

Location: Toronto Congress Centre, 650 Dixon Rd. Toronto, ON, M9W 1J1

| Seminars      | Room 1<br><i>Product focus</i>                                                                                                                                                                                                                  | Room 2<br><i>Application focus</i>                                                                                                                                                                          | Room 3<br><i>Case studies</i>                                                                                                                                                                                    |
|---------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 9:50 – 10:30  | <b>Digital Metering</b><br>Review of Hardware. New product developments; firmware and new features. High end and power quality meters.<br><i>James Clark</i><br><i>Schneider Electric</i>                                                       | <b>Advanced Web Reporting with ION Enterprise</b><br>Version 6.0 has a new tool allowing reports to be customized.<br><i>Benoit Barbalat</i><br><i>Schneider Electric</i>                                   | <b>Enterprise Energy Management at a University.</b><br>Comprehensive energy reporting and analysis on a campus.<br><i>Ray Robichaud / Claire Bennett</i><br><i>Wilfrid Laurier University</i>                   |
| 10:30 – 11:10 | <b>PowerLogic SCADA</b><br>A reliable and high performance monitoring and control solution for industries to reduce outages and increasing power efficiency.<br><i>Denis Arnaud</i><br><i>Schneider Electric</i>                                | <b>Power Quality Analysis</b><br>The meters detect disturbances and PQ conditions – what does it mean?<br><br><i>John Straughn,</i><br><i>Schneider Electric</i>                                            | <b>Multi-site monitoring</b><br>Using a BAS to monitor all schools across the board to help drive energy savings.<br><br><i>Dave Dawson</i><br><i>TA Canada</i>                                                  |
| 11:10 – 11:50 | <b>Energy Management Software</b><br>Overview of PowerLogic ION Enterprise and EEM.<br><br><i>Benoit Barbalat</i><br><i>Schneider Electric</i>                                                                                                  | <b>Critical Power System Testing</b><br>Automated testing, monitoring, and reporting. Take backup power system reliability to the next level.<br><br><i>Markus Hirschbold,</i><br><i>Schneider Electric</i> | <b>Earth Rangers</b><br>Information system used to identify, analyze and report on energy savings and sustainability initiatives with public dashboard displays.<br><i>Brett Sverkas</i><br><i>Earth Rangers</i> |
| 11:50 – 12:30 | <b>Remote Energy Monitoring</b><br>Web hosted services that allow you to take control of your costs by providing the information you need to understand how your organization uses energy<br><i>Richard Henzie</i><br><i>Schneider Electric</i> | <b>Energy Dashboards</b><br>Learn about the new user dashboards to be released in PowerLogic ION Enterprise 7.0.<br><br><i>Tony Hunt</i><br><i>Schneider Electric</i>                                       | <b>Advanced Power Quality Analysis on Transmission Lines</b><br>Using meters to trace the effects of harmonics from solar and wind farms.<br><i>Mike Dang</i><br><i>Hydro One Networks Inc.</i>                  |
| 12:30 – 1:30  | <b>Lunch</b>                                                                                                                                                                                                                                    |                                                                                                                                                                                                             |                                                                                                                                                                                                                  |
| 1:30 – 2:15   | <b>ISO 50001</b><br>The new ISO standard for energy management has been formally ratified. How will you be affected?<br><i>Jon Feldman</i><br><i>Ontario Power Authority</i>                                                                    | <b>Benefits of an Energy Audit</b><br>How can your facility benefit from an energy audit?<br><br><i>Greg Lee</i><br><i>Schneider Electric</i>                                                               | <b>Technical Workshop</b><br>Application Questions, tips'n tricks with Advanced Web Reporting with PowerLogic ION Enterprise.<br><i>Tirtho Duttgupta</i><br><i>Schneider Electric</i>                            |
| 2:15 – 2:30   | <b>Closing Comments – Draw Prizes</b>                                                                                                                                                                                                           |                                                                                                                                                                                                             |                                                                                                                                                                                                                  |
